Circular Economy

A circular diagram illustrating the circular economy process. It features three main stages: 'Design og produktion' (Design and production) at the top left, 'Forbrug' (Consumption) at the top right, and 'Recycling' at the bottom. The 'Design og produktion' stage is represented by a blue building icon. The 'Forbrug' stage is represented by a hand holding a green circular arrow icon. The 'Recycling' stage is represented by a hand holding a red circular arrow icon. A large blue arrow points from 'Design og produktion' to 'Forbrug', and a large green arrow points from 'Forbrug' to 'Recycling'. A large red arrow points from 'Recycling' back to 'Design og produktion', completing the cycle. The background is light gray with faint icons of a lightbulb, a stack of boxes, and a recycling bin.

Why is Circular Economy interesting for workers?

- Job creations
- New competencies

Circular Economy

A circular diagram illustrating the circular economy process. It features three main stages: 'Design og produktion' (Design and production) at the top left, 'Forbrug' (Consumption) at the top right, and 'Recycling' at the bottom. The diagram is composed of three large, curved arrows forming a circle. The top-left arrow is blue and points from the production stage to the consumption stage. The top-right arrow is green and points from the consumption stage to the recycling stage. The bottom arrow is orange and points from the recycling stage back to the production stage. The background includes icons of a factory, a hand holding a circular arrow, a hand holding a recycling symbol, and a hand holding a recycling symbol over a trash bin.

Can there be any working environment problems?

- **Handling of waste**
- **Heavy lifts**
- **Chemicals and hazardous materials**

Circular Economy

How can workers be involved in Circular Economy?

- Involve employees in how the company can contribute to recycling and reuse

Circular Economy

A circular diagram illustrating the circular economy process. It features three main stages: 'Design og produktion' (Design and production) at the top left, 'Forbrug' (Consumption) at the top right, and 'Recycling' at the bottom right. Arrows connect these stages in a clockwise cycle. The background includes icons of a factory, a hand holding a circular arrow, and a hand holding a brick.

Examples of Circular Economy?

- Used plastic for new food packaging
- Menure for biogas and fertilizer
- Used clothes for new fibers
- Rubber used in asphalt pavement
- Used building materials from one construction to the next

Circular Economy

A circular diagram illustrating the circular economy process. It features four main stages: 'Design og produktion' (Design and production) at the top left, 'Forbrug' (Consumption) at the top right, 'www.groennejob.dk' at the bottom right, and 'www.groennejob.dk' at the bottom left. The stages are connected by arrows forming a circle. A lightbulb icon is on the left, and a recycling symbol is on the right. The background includes icons of a factory, tools, hands, and a recycling bin.
